

WHAT EXACTLY IS "THE NEW AGE?"

Next time anyone accuses you of being a "New Ager" you can wholeheartedly agree by educating them with the fact that they are also included in this coming new age and here's what that means:

It is the Dawning of the Age of Aquarius as we are leaving the Age of Pisces. Which simply means that "this is the dawning of the Age of Man as Divine Being Consciously Perceived and Consciously Experienced as All."
~Raj/Jesus

Yes indeed, the "New Age" of enlightenment is upon us.

The Precession of the Equinoxes is very well known and important concept in astronomy. It was known to all of the famous ancient civilizations, which is very interesting, since it requires a rather sophisticated understanding of mathematics and astronomy to have been able to track and map out such an extremely long-lasting cycle as this. (Ancient Hebrews called the Zodiac "Mazzoreth," meaning "animal wheel.") The Zodiac is used to chart the repeating 25,920 year cycle known as Precession. This cycle is also known as a "Great Year," or a "Platonic Age." It spans the amount of time it takes for the position of the stars to return to the same place again on a given morning at sunrise. 26,000 years (approx.) This "Great Year" is divided into twelve sections, each represented by one of the famous Zodiac animals (constellations), and each lasting for about 2160 years. This is the basis of our Western "long-count" calendar.

If you are following the wheel month by month, asking "what sign are we in this month?" or whatever, in that case, yes, Aries comes after Pisces and the count starts on Virgo. But when counting the successive 2160-yr ages (called "Aions" or "Aeons"), the wheel goes in the OPPOSITE direction, and begins with Aquarius. We can see this represented in (I think) the book of Exodus, where Moses punishes those worshiping the golden calf. "gold" and a baby bull. This can mean the sun rising in Taurus. After this, Moses has the head of a Ram held up at the lead of ceremonial processions, such as when taking out Jericho. This can be read to represent that they had passed into the age of Aries. When Jesus then comes along and feeds the masses with the Two Fishes, one can see this as the initiation into the age of Pisces, the 2 fishes. And when his disciples ask him, "where should we go to prepare at Passover?" he says "follow the water bearer." Indicating

Aquarius to those of us with an eye for astronomical knowledge in ancient texts.

Aquarius begins, either in about 150 years, or in about 2 years, or about 50 years ago, depending on which system you use. (there are others also) I think Freemasonry reckons it to begin in about 2 years. I think this because the Masonic calendar ("Anno Lucis") begins at what we call 4000 B.C. (0 A.L.) And they obviously seem to reckon Jesus to have begun at about 0 A.D. (or 4000 A.L.) So it seems that they may have actually been counting 2000-yr ages, and that all those extra "160's" must add up ($160 \times 12 = 1920$) to create a 13th age on this "long-count" calendar. After all, the Zodiac IS known to have a sort of "hidden" 13th sign called "Ophiucus."
